- Service Code Management skills using GitHub, prepare, plan, and deploy applications in Enterprise releases.

### WORK EXPERIENCE

#### Accenture

Senior Software Developer  
Client - National Australia Bank

May 2022- Present

- Worked on Data migration and warehousing projects, using SQL, Linux, Aws and ETL tool and GIT.
- Experienced in Crm system mainly using Oracle and Aws applications for Data migrations and as customer data custodian.
- SME in ETL projects.
- Worked for projects to reduce cost on data migration through On Prem to Cloud AWS to save time and number of packages used in project.
- Worked on automating Data migration projects.
- Involved in CRS data audit extracts for bank which involved millions of audit record checks for giving data insights to the business requiring it for customer due diligence check for compliance purpose.
- Used Agile Technologies, Prepared ETL logic and solutions to load data in optimized way.
- Delivered projects that increase efficiency in data sync across various entities across the bank.

#### Accenture

Software Developer  
Client - National Australia Bank

October 2017 – May 2022

- Worked in CRM project performing data migrations data reconciliation and development.
- Development in ETL project to improve setup data migration according to the Bank requirements.
- Involved in software development lifecycle providing System Integration Testing.
- Fixing the issues and automating the manual activities.

#### Industry Project (Data Science)

Business Analyst

- Technologies used: Python, Jason, Github, Linux, tableau.
- Designed and Developed machine learning models to detect Credit card fraud in financial institutions.
- Exploratory Data Analysis (EDA) is an analysis approach that identifies general patterns in the data.
- Worked on Crime data analysis machine learning model.
- Developed Virtual Assistant and Chatbot NLP model using python.
- Generated Analytical graphs and conclusions on customer activities.
- Analyzing business processes, identifying opportunities for improvement, and ensuring the technology solutions to meet the needs of the client.

### PORTFOLIO

Industry Projects: Reports and Machine learning Projects:  
• <https://github.com/suntoabhi/machinelearning>

### EDUCATION

- Post Graduate Diploma in Data Science**  
IIT-B  
Specialization in Business Analytics.
- Bachelors of Engineering in Electrical and Electronics Engineering**  
Osmania University
